For help assessing your needs and choosing a server rack solution, contact your local Vertiv sales representative or visit our interactive product selector. Choosing the best server racks for your network infrastructure is crucial for optimizing performance and cost. Explore our range of server racks designed to meet your current and future needs.

What is a network rack?

A network rack (also called a server rack) holds networking equipment such as servers, modems, uninterruptible power supply (UPS) units, routers, network switches, and audio and video equipment. Server racks can be a specialized computer case, wall-mount rack, standing frame, or server cabinet designed to enclose networking equipment.

Which server rack should I Choose?

For instance, an enclosed rack would be your go-to choice if you prioritize security and dust protection. On the other hand, an open-frame rack would be ideal for environments requiring quick and frequent access to the equipment. Ensuring the server rack you choose matches your specific needs is crucial.
