

This project directly supports Albania's objective to generate 30% of its electricity from non-hydropower renewable sources by 2030, a goal bolstered by numerous Albania solar projects.

The Ministry of Infrastructure and Energy of Albania received four applications for solar power projects with a combined capacity of 235 MW. A proposed unit in Fier, the country's ...

Project Blue is the first utility-scale initiative in the Balkans constructed without government subsidies. It features Trinasolar's ultra-high performance Vertex dual-glass bifacial modules and the Vanguard 1P ...

Albania is advancing its renewable energy ambitions with a planned 50 MW solar park in the Fushë-Krujë area, a project propelled by an EU grant from the Western Balkans Investment ...

As a country situated in a region with abundant solar resources, Albania has enormous potential for using solar energy through photovoltaic (PV) systems. With the energy crisis repeating ...

A ceremony took place in Albania, 22 July 2025, to sign the agreement to build a new solar photovoltaic power plant at Belshi. The EUR42 million project is co-financed by an EU contribution ...

The 140MW Karavasta plant, the largest PV project to date in Albania and the Western Balkans, has been successfully connected to the grid.

Albania's renewable energy sector is booming, and photovoltaic systems paired with 500kW inverters are leading the charge. This article explores how these industrial-scale solutions address energy ...

They offer a wide range of solar energy products, including grid-connected systems and battery backup solutions, supported by a team of qualified engineers experienced in photovoltaic technology.

Albania's solar transformation demands reliable grid-connected inverters that balance performance with smart features. As feed-in tariffs evolve and grid codes tighten, choosing adaptable solutions like EK ...
