

Jurchen Technology and Blue Circle Energy have agreed to build a 60 MW portfolio of solar projects across 11 parishes in Barbados. The project consists of ground-mounted panels using...

The project, spanning 50 sites across the island-state, is a significant step towards achieving the goal of powering Barbados with 100% renewables by 2030, supplementing the existing 30 MW solar portfolio.

Blue Circle Energy has over 50 renewable energy sites under development in Barbados, ranging in size from 250kW to 5MW. The project sites are distributed throughout the island, are located in each of ...

The European Union and Barbados have taken an important step towards a sustainable energy future with the launch of the Renewstable Barbados project which aims to integrate solar ...

Construction of the proposal is expected to take approximately 6 months, supporting the Barbados Governments plan to produce 100% of its electricity from renewable sources by 2030.

Phase one will generate 30 MW of solar power and is set to be operational by December 2024. Phase two will add another 20 MW and is expected to be completed by September 2025. This ...

The Project, which will deliver non-intermittent, carbon-free, and renewable electrical power to the national grid, will also accommodate a medium-scale Blackbelly sheep farming facility within the ...

Barbados-based renewable energy developer Blue Circle Energy is partnering with a company from Germany to build 50 solar projects, generating 60 MW of energy, across the island's ...

In May 2014 the Barbados Light and Power Company (BL& P) invited proposals for an 8MW (AC) solar farm in St. Lucy. Approximately 40 companies bid on the project, mostly international ones and a few ...

The agrivoltaic nature of the proposed solar plant adheres to an unwritten Barbados policy requiring the dual use of clean energy generation sites. Steinman estimates the portfolio will ...
