

RNBC is a leading cooling plate manufacturer that provides top-quality products and research and development services for thermal management. Our vision is to make constant temperatures for ...

Introducing the Direct Cold Plate, an efficient heat exchange system utilizing refrigerant to rapidly dissipate heat from battery applications to the air conditioning system. Our versatile design offers ...

Heat management in battery systems & similar applications is critical. Switzer is your premier partner in manufacturing cooling plates essential for hydrogen fuel cells & hydrogen generation.

Need reliable battery cooling plates? Discover certified manufacturers for electric vehicles and energy storage. Compare custom solutions and request quotes now!

Efficient battery cooling solutions with customised cold plates for EVs, electric car battery boxes, and battery packs, designed for optimal thermal management

High corrosion resistance and low conductive material suitable for battery cooling applications Flexible designs solutions for low pressure drop in all packaging

Sogefi offers a full range of innovative battery cold plate solutions to meet the diverse needs of EV battery pack architectures. Laser welded extruded designs, and laser welded cold plates are ...

ToneCooling designs and manufactures custom battery cold plates for EV battery packs, commercial vehicles, stationary storage and backup power systems. We support prismatic, pouch ...

It is expected that there will be an increasing demand for the cooling plates due to the demand for improved battery technology and energy density by top electric vehicle battery cooling ...

Valeo designs and manufactures compact and cost competitive battery cooling solutions (refrigerant, liquid and air cooling) to cater for all types of powertrains: hybrids in Japan and the U.S.; ...
