

Why should you invest in energy-efficient products?

Millions of American consumers and businesses choose or invest in energy-efficient products. Anywhere that energy is used, there is an opportunity to improve efficiency. Some products, such as your HVAC system and water heater, are major energy-users and can experience large energy and cost savings through improvements in energy efficiency.

How can buildings be more energy-efficient?

As of 2018, buildings contributed 36 percent of total carbon dioxide emissions from energy use in the United States. Reducing energy use from buildings is therefore critical for mitigating the impacts of climate change. Buildings can become more energy-efficient through the use of more efficient technologies and from optimal building design.
