

Discover how industrial batteries and smart EMS systems drive energy transition in Belgium: cut costs, earn flexibility revenues, and meet EU targets.

The two-phase development is set to enhance grid stability and provide reliable, clean energy for up to 96,000 households in Belgium. "Battery storage is one of the most critical, yet often overlooked, ...

ENGIE's acquisition of a biomethane production unit in Belgium supports its strategy to expand biomethane production across Europe. The major milestones for Belgium's electricity supply ...

This comprehensive solution not only overcomes power capacity expansion constraints but also generates economic benefits from the price differential between peak and valley electricity ...

Discover how advanced UPS solutions protect Belgium's growing data center industry from power disruptions while optimizing energy efficiency. Learn about tailored approaches for mission-critical ...

By 2030, these ports will implement onshore power supply (OPS) systems to reduce emissions from moored containerships, aligning with upcoming EU regulations which require ships ...

The containerized renewable energy system market is experiencing robust growth, driven by increasing demand for reliable and sustainable off-grid and remote power solutions. ...

NHOA Energy will deliver an 80 MW/320 MWh NHEXUS battery system at ENGIE's Drogenbos station near Brussels under a 15-year contract. The 88-container, four-hour BESS will ...

Shore power is a highly efficient way of reducing emissions from ships while they are berthed. Instead of using onboard diesel generators, ships can connect to the electricity grid available at the wharf. ...
