

Can the locker be integrated with the cupboard

What is a space locker?

The term "locker" within Space can refer to a locker, cupboard, display cabinet, box, or case fitted with an electronic device that controls the lock. Salto lockers are commonly used in corporate organizations, universities, and gyms. The lockers functionality is license-dependent. See Registering and licensing Space for more information.

Are locker combinations a greener option?

Locker combinations are also a greener option. This is because their modular structure means they can be relocatable and reconfigurable if the needs of the space or people change. The adaptability that the locker combinations provide mean that an investment now can take many shapes going into the future.

Are lockers compatible with other spacestor products?

Lockers are a medium through which all other products can sing. This is because they can be customized to any height, enabling a seamless compatibility with any other Spacestor product. Past projects have manifest the effectiveness of breaking large runs of lockers with other features, such as a collaboration space or a site for impromptu meetings.

Why should you use a smart locker system?

In healthcare environments, hygiene and organization are essential. Smart locker systems help ensure lockers are always available when needed, while also providing secure, monitored management of medication storage. Secure storage options during a visit to a swimming pool or leisure park provide a feeling of wellbeing and security.
