

With a power generation capacity of 30 megawatts, this was one of the largest solar power facilities in Linxian and it was designed to offer revenue to dozens of villages in its neighborhood.

There are solar photovoltaic panels on almost all its rooftops and in every courtyard. For generations, residents of the village in Wuyuan county, Inner Mongolia autonomous region, depended on straw, ...

For a decade, solar power has been bringing opportunities to China's villages. What does that mean today?

In the past 17 months, 27 families installed solar panels capable of supplying power to 82 households. Trials for the panels progressed smoothly, and next month a new micro power network ...

Solar panels cover barren hillsides in Jishan county, Shanxi. Experts believe that solar power can help rural vitalization, which has been adopted as a national development strategy.

The solar farm, owned and operated by the village, consists of about 400 photovoltaic panels on 0.2 hectares of land. Electricity generated from the panels is connected to a nearby substation and then ...
