

It is suitable for cooling and heating energy storage batteries, as well as other temperature-sensitive equipment. This model, with functions including host computer communication and alarm, is highly reliable and easy to ...

Designed for high-density energy storage, this cooling unit combines 20 years of expertise for safe, reliable, and efficient cooling. It uses a fan to release heat and a compressor system with glycol for cooling.

Our BESS Chillers are engineered specifically for containerized and utility-scale storage systems, ensuring safe, efficient, and long-life battery operation even in extreme climates.

The unit can operate reliably in harsh environments such as low temperature, high temperature, high salt and high humidity, thunderstorm weather, high altitude and sandstorm, thus ensuring the safety of energy ...

Reliable cooling for project-specific requirements. Air- and water-cooled chillers from the Stulz portfolio "CyberCool" and the "Explorer Line". Ingeniously simple, fully symmetrical, and patented worldwide. This is ...

Engineered specifically for today's evolving BESS (Battery Energy Storage System) landscape, these award-winning chillers are setting bold new standards in reliability, versatility, and energy savings.

Based on market demand, we have developed two different liquid cooling solutions specially designed for Li-ion Battery Energy Storage Outdoor Cabinets: Both solutions safely operate in cold and hot regions, between ...

The Trane® Thermal Battery air-cooled chiller plant is a thermal energy storage system, which can make installation simpler and more repeatable, saving design time and construction costs.

Widely used in energy storage and exchange stations, 1000V600A liquid cooled charging piles, 500KWH, 1000KWH, and 2MWH containers for energy storage containers.

Learn how Boyd created a custom door-mounted Chiller solution for Battery Energy Storage Systems (BESSs) to optimize battery performance and reliability.
