

# European solar power generation sells for money

The price of solar PV modules has decreased significantly over the past decade, with the cost of solar power falling below grid parity in many parts of Europe, thereby increasing market competitiveness, as both ...

This article explores Europe's solar achievements in 2024, highlighting key areas of growth and developments according to data reported by energy think tank Ember.

This March, solar came to the rescue of Europe's high power prices thanks to sunnier days and increased capacity, with 65 GW added in 2024 alone. As a result, the share of renewables in the power mix ...

The EU solar sector continues its upward trajectory, with mid-2025 figures confirming robust growth. SolarPower Europe's latest analysis highlights record installations, policy momentum, and the ...

The Europe Distributed Solar Power Generation Market is poised for sustained expansion, driven by rising awareness of renewable energy, supportive government policies, and technological advancements enhancing ...

About The European Electricity Review analyses full-year electricity generation and demand data for 2023 in all EU-27 countries to understand the region's progress in transitioning from fossil fuels to clean electricity. It is ...

This essential resource is developed with contributions from SolarPower Europe's members and various national solar associations. It aims to assist policymakers, industry stakeholders, and investors in ...

Over the last decade, the cost of photovoltaic (PV) panels and associated technology has fallen dramatically. Even with supply-chain fluctuations, solar remains one of the most cost-effective forms of new ...

Wind and solar power production in Europe's five biggest markets rose 12% year over year in September, with wind exceeding solar for the first time since April, adding downward pressure on capture ...

Sweden, the Netherlands, Germany, Spain, and France have each logged more than 500 hours of negative electricity prices this year, driven by excess renewable generation and volatile weather.
