

Georgia Power recently announced that construction is underway for four new battery energy storage systems in strategic counties across the state to support energy capacity needs.

That's where Tbilisi EMS energy storage systems come into play. As Georgia's capital accelerates its renewable energy adoption, smart energy management isn't just technical jargon - it's ...

That's the Tbilisi Energy Storage Base - not just another battery farm, but a game-changer in the Caucasus energy landscape. Opened in late 2024, this lithium-ion wonder stores surplus wind ...

Georgia is on track to deploy more than 1GW/4GWh of utility-scale storage by 2027, outpacing every other Southeastern state. Driven by economic growth and evolving grid ...

With 23% annual growth in renewable installations since 2022, Georgia's capital needs better ways to manage its clean energy. That's where electronic energy storage systems (ESS) come in, and ...

Georgia Power announced today that it has started construction on a new 200-megawatt (MW) battery energy storage system (BESS) in Twiggs County, southeast of Macon, Ga.

Their patented EMS (Energy Management System) does something clever - it actually coordinates with neighboring microgrids. Imagine if your home battery could "borrow" capacity from nearby office ...

Energy management systems (EMSs) are required to utilize energy storage effectively and safely as a flexible grid asset that can provide multiple grid services. An EMS needs to be able to accommodate ...

Earlier this month, Georgia Power Company submitted its 2023 Integrated Resource Plan Update (2023 IRP Update) to the Georgia Public Service Commission, which includes an Application ...

We work closely with Georgia's universities to identify cutting-edge research regarding energy storage and provide companies with access to the latest applied research. We connect companies to ...
