

Mainly used Solar photovoltaic product packaging, Beautiful appearance, recyclable, can minimize the fragmentation rate of silicon chips, good cushioning, low thermal conductivity, excellent heat ...

The polypropylene hollow sheet is an extruded plastic board with hollow structure, which is made of non-toxic eco-friendly polypropylene. It also can be called twin-wall plastic ...

Generally, PV cells in a PV module may be crystalline, semi-crystalline, or amorphous and they are safely packaged in multiple protective layers including front cover, encapsulate, and back sheet.

Solar PV Hollow Board Anti-UV corrugated PP boards for solar panel backing and junction box protection. Withstand PID testing >3000hrs. IEC 61215 compliant.

Hollow boards are also widely used in the photovoltaic industry, primarily as photovoltaic backing sheets. The required hollow board should be 3 mm thick with a density of 500 g/m³. 2 The most ...

Photovoltaic Silicon Chip Packaging Box Hollow Panel Construction Heat Insulation Buffer Secure Transit Solar Cell Modules

Our plastic sheets, boxes, and formwork panels are built to last -- lightweight yet tough, water-resistant, and fully recyclable. Designed for repeated use in packaging, printing, and construction, they help ...

Whether for lightweight packaging or durable construction, we provide the ideal plastic hollow board solution. Our team is ready to help you select the right material, thickness, and features to ensure the ...

The integration of ultra-large packaging options, adherence to GEM standards, and the adoption of innovative materials like honeycomb structures signal a promising future for solar panel ...

Our protective packaging lineup for the solar industry includes shrink and stretch films, banding, corner protectors, module spacers, bubble wrap, foam inserts, and corrugated boards.
