

How many energy storage stations are there in the UK

Map of energy storage facilities in the UK, with information provided by research organisations and from the Department for Business, Energy and Industrial Strategy (BEIS).

Installed capacity of energy storage systems in the UK 2023-2050, by technology Published by Lucía Fernández, Nov 28, 2025

Explore how many power stations are there in the UK and grasp the underpinnings of the nation's energy infrastructure with our in-depth analysis.

As of June 2023, there are 161 operational BESS sites in the UK of varying sizes with a combined electricity storage capacity of 2.6GWh (enough to power around 5 million homes for an hour).

Interactive map of the UK's operational electricity generating stations showing generation technology and installed capacity.

With more than 9GWh of operational grid-scale UK battery energy storage systems (BESS) capacity along with a strong pipeline, it is worth identifying the hotspot of the region and how the spectrum ...

How many energy storage projects are there? Currently there are 2469 energy storage projects tracked in the EnergyPulse database (including inactive projects, as of 18/11/2024), covering details such as ...

At the time of writing, there are over 1,000 battery energy storage system (BESS) projects in the pipeline. These are growing in size too. The growth in battery storage reflects the direction in ...

A guide to battery storage facilities in the UK, including current locations, planned projects, and how they support the grid.

Currently there are 2469 energy storage projects tracked in the EnergyPulse database (including inactive projects, as of 18/11/2024), covering details such as project capacity, development ...
