

How many photovoltaic panels are installed in Australia

Australia leads the world in residential uptake of solar, with a nation-wide average of free-standing households with a PV system at over 20%. [6] By early 2020, Australia had 10.7 GW of rooftop solar ...

Australia now leads the world in per capita household solar, with more than 4 million homes - approximately one in three - equipped with solar panels[1]. This release includes household ...

Over 4.2 Million homes and businesses in Australia have installed solar panels and are reaping the savings benefits of solar while also reducing their carbon emissions.

4,154,426 solar panel installations have been completed across Australia from 2001 to 30 June 2025, generating a substantial 26,704,295kW of rated capacity. Australia maintains its position as the ...

IN AUSTRALIA The penetration of Australian rooftop photovoltaics (PV) in the energy market continues to grow and contributed roughly 15 per cent (approximately 8,172 GWh) of the National Electricity ...

According to the Clean Energy Council almost three million Australians now have solar panels on their rooftops. Australia is rapidly embracing green energy.

OverviewProjectsInstallations by typePotentialIncentivesSupply chainRenewable energy targetsSee alsoProjects with a power rating less than 100 MW are not listed. A 20 MWp solar power plant has been built on 50 hectares of land in Royalla, a rural part of the Australian Capital Territory south of Canberra. It is powered by 83,000 solar panels, and can power 4,400 homes. It was officially opened on 3 September 2014. It is the first solar plant facility in the Australian capital, and at the time of building the l...

As of 30 September 2025, there are over 4.22 million PV installations in Australia, with a combined capacity of over 43.0 gigawatts.

Fast forward to the end of November 2025 and more than 4.62 million solar panel systems have been installed on rooftops throughout the nation. Gigawatts of large scale solar energy ...

See Australia's 2026 rooftop solar statistics, including national capacity, state-by-state installations, system sizes, battery attachment, exports and penetration rates. Updated with Clean ...

Australia ranks fifth globally in installed solar photovoltaics (PV) capacity, trailing only China, the United States, Japan, and Germany (World Bank, 2023). This achievement underscores the nation's ...
