

Does Huawei make batteries?

Even though Huawei doesn't manufacture batteries, the company is putting plenty of R&D resources into developing a new solid-state battery tech. The newest patent reveals a battery pack that can go for 1,860 miles away from the plug and fully charge in just five minutes. This is perhaps one of the craziest technologies we've heard so far.

Will Huawei enter EV battery market?

Huawei's entry into the EV battery market adds momentum to an already competitive space. Its solid-state battery offers up to 500 Wh/kg in energy density and charges in just five minutes. This could set new industry standards and urge competitors to accelerate their development.

How many miles can a Huawei battery charge?

Huawei promises that its battery technology could deliver around 1,864 miles of range and achieve a 10% to 80% charge in under five minutes.

What does Huawei's patent mean for EV battery development?

Huawei's patent focuses on a few key improvements that address common problems in solid-state battery development, including: This gives the battery a much longer driving range. Under China's CLTC test cycle, the range reaches 3,000 km. Under the stricter U.S. EPA test, it would still exceed 2,000 km, well beyond most current EV models.

[Beijing, China, November 18, 2025] Huawei Digital Power, in collaboration with leading industry partners, has successfully passed a rigorous technical appraisal conducted by the China Electricity ...

Huawei's patent focuses on a few key improvements that address common problems in solid-state battery development, including: Higher energy density This gives the battery a much ...

1,860 miles range"&gt; This is perhaps one of the craziest technologies we've heard so far. Huawei boasts between 400 and 500 Wh/kg energy density, between two and three times more than the currently ...

Nevertheless, Huawei's entry signals serious momentum in China's pursuit of battery innovation leadership. If scalable, these breakthroughs could transform electric mobility--eliminating ...

With major players announcing 1 GWh of supply deals in a single week, Central and Eastern Europe is rapidly emerging as a key battleground for Chinese battery storage companies.

Chinese tech giant Huawei has filed a patent for a next-generation solid-state electric vehicle (EV) battery that claims to offer an unprecedented driving range of over 3,000 kilometres on a ...

China's tech giant claims 1,800-mile range for solid-state EV battery, files patent Huawei's patent application reveals that its battery uses a method of doping sulfide electrolytes with ...

Huawei has stepped up its ambitions in advanced energy storage with a patent for a sulfide-based solid-state battery that offers driving ranges of up to 3,000 kilometres and ultra-fast ...

Huawei CloudLi Smart Lithium Battery integrates advanced power electronics, IoT, and cloud technologies, offering intelligent energy storage solutions with real-time monitoring and management ...

Chinese companies are now responsible for more than a third of solid-state battery patents filed annually. Out of the blue, Huawei has filed for a solid-state battery chemistry that can offer up ...
