

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.

Before the year 2030, more than half of the world's electricity will come from low-emission sources according to the IEA. A lot of progress has been made - a boom in solar and wind energy ...

Discover the world's largest solar farms in 2025. Complete rankings, capacity data, locations, and analysis of mega solar projects transforming global energy.

These projects, from solar-powered airports to pioneering solar flights, not only highlight the technological advancements in renewable energy but also underscore a collective commitment to ...

Discover the world's biggest operational solar farms and the mega projects set to reshape tomorrow's renewable energy landscape.

With 113 applications from 29 countries, this year's challenge highlighted cutting-edge innovations shaping the future of solar energy across Latin America and the Caribbean.

Take a virtual tour of some remarkable renewable energy projects from around the globe, each showcasing innovative technology, ambitious scale, and a commitment to a cleaner, more ...

The Global Solar Power Tracker is composed of worldwide facility-level data on utility-scale (1 MW+) solar photovoltaic (PV) and solar thermal facilities, as well as country-aggregated distributed (&lt;1 ...

Several significant solar projects were announced or progressed worldwide during October 2025, reflecting strong ongoing investment in renewable energy across key regions.

In this article, we explore some of the most impressive solar projects from around the world. Although this list isn't ordered by size, we are kicking off with the world's biggest solar farm. Bhadla solar farm ...
