

We do our best to provide information such as the JKM445N-54HL4R-BDB-F2-OC Tiger-Neo panel dimensions, datasheet, warranty information, wattage and more wherever possible.

9BB technology decreases the distance between bus bars and finger grid line which is benefit to power increase. Certified to withstand: wind load (2400 Pascal) and snow load (5400 Pascal). Nominal ...

High-efficiency photovoltaic cells with up to 21.5% conversion rate. Durable anodized aluminum frame resistant to corrosion and mechanical stress. Bypass diodes integrated to reduce shading impact and ...

With its innovative technology, these panels generate clean energy, reducing the carbon footprint associated with traditional energy sources. By choosing Jinko Solar 445 modules, you are making a ...

Detailed profile including pictures, certification details and manufacturer PDF.

HOT 100% Multi Busbar Technology Better light trapping and current collection to improve module power output and reliability. Reduced Hot Spot Loss Optimized electrical design and lower operating ...

The parameters are subject to the actual situation, and the final interpretation right belongs to the company. High salt mist and ammonia resistance. Minimizes the chance of degradation caused by ...

Excellent Anti-PID performance guarantee via optimized mass-production process and materials control. The N-type module with Hot 2.0 technology has better reliability and lower LID/LETID. High salt mist ...

Mechanical Load Certified to withstand: wind load (4000 Pascal) and
