

A 2023 industry report showed proper thermal control extends battery life by 60% in Balkan climates. Our Pristina pilot project uses liquid cooling plates between modules, maintaining optimal

Enter the 200MWh battery storage project, funded by a \$234 million U.S. grant [1] [2]. This isn't just a Band-Aid fix; it's a leap toward grid stability and renewable energy integration. ...

Kosovo has taken a significant step towards a sustainable energy future by granting its first-ever licenses for battery energy storage systems.

The Presidency of Kosovo announced on Wednesday afternoon that it had received confirmation of the continuation of the \$202 million MCC grant, centered on the battery storage ...

The Resident Country Director of the Millennium Challenge Corporation, Rinor Gjonbalaj, highlighted that the energy storage system will be the first of its kind in the region. According to him, ...

Lithium battery energy storage power stations in Pristina represent more than technology - they're Kosovo's bridge to energy independence. As projects scale and costs decline, these systems will ...

The Compact Program, through the BESS project, will install a high-capacity energy storage system of 170 MW (or 340 MWh), with a total value of \$180 million, out of which, KOSTT will benefit by ...

The Energy Storage Project aims to support Kosovo's energy security by using battery storage systems to provide reserves, improving system availability, and reducing the cost of securing adequate ...

Transmission, System and Market Operator (KOSTT) of Kosovo* signed a contract with the Ministry of Economy and Municipality of Ferizaj, receiving 2.3 hectares of land for a 45 MW ...

Today we are here to mark a necessary and appropriate step in the development of Kosovo's energy sector, as we officially open the pre-qualification process for the construction of ...
