

Ukraine's largest private energy company DTEK secured a \$72-million loan to build one of the largest battery energy storage complexes in Eastern Europe, the company said on June 3.

Our 1 GW project combines gas, solar, and battery storage to secure Kyiv's grid, cut emissions, and support critical services. Explore investment in this high-impact initiative.

With Ukraine's renewable energy capacity growing by 23% annually since 2020 (Ukrainian Renewable Energy Association), Kyiv manufacturers are answering the call for reliable energy storage systems.

DTEK has energised the largest battery storage project in the war-torn country and one of the biggest ones in Eastern Europe. The 200 MW/400 MWh installation spans six sites ranging ...

With a focus on enhancing the efficiency and sustainability of Ukraine's renewable energy market, the company provides comprehensive services for the design and management of energy storage systems.

The six battery energy storage systems (BESS) range from 20MW to 50MW each, have been connected to the power grid in the Kyiv and Dnipropetrovsk regions, and will provide ancillary ...

The company claims that they develop these ultra-capacitors using proprietary technology which has low internal resistance, high specific power and energy characteristics, low weight and ...

Fluence and DTEK (through its subsidiary DTEK Renewables) plan to complete the project by October 2025, so that systems are in place before the 2025/26 winter season to ...

The new project aims to strengthen Ukraine's energy security and support the transition to a greener energy system. DTEK Group aims to commission the new storage systems by ...

Ukraine's biggest private energy firm, DTEK, has launched a major battery storage facility that will bring power to hundreds of thousands of homes and strengthen the grid ahead of expected ...
