

Top energy news: Global renewables generation hits 40%; Britain's last coal-fired power plant to close; AI "could hurt oil prices in next decade".

Read the latest research on renewable sources of energy such as solar energy, wind power, nuclear energy, hydrogen fuel, ethanol, methane and other alternative energy sources.

Get the latest renewable energy news, trends, and insights on solar, wind, storage, and policy changes. Stay ahead with Factor This" expert coverage.

Globally, we have lowered our renewable energy growth forecast for 2025-2030 by 5% compared to last year, to reflect policy, regulatory and market changes since October 2024. This revision means we ...

Discover the latest innovations transforming renewable energy, from advanced solar and wind systems to AI-driven bioenergy and geothermal breakthroughs.

News, interviews and comments for the global renewable energy industry with a focus on green hydrogen, wind energy, solar power, energy storage and PPAs.

Keep up-to-date with the renewable energy news updates and current renewable projects.

Latest news on renewable energy, providing comprehensive coverage of solar, wind, hydro, geothermal power, green hydrogen, and sustainable technologies shaping the future of clean energy.

In 2025, water electrolysis for green hydrogen production continued to progress towards gigawatt-scale deployment worldwide, whereas CO2 electrolysis for carbon-based fuels and ...

Yet even with this significant growth in renewable and other zero-emission capacity, the world is still burning, and increasing its use of, fossil fuels. Geopolitical turmoil and volatile markets ...
