

Protecting your data center from lightning requires more than just ...

Aegisflash delivers end-to-end lightning and surge protection systems designed specifically for data center environments, ensuring uninterrupted service and robust resilience.

We design and implement tailored lightning protection systems for data centers, incorporating advanced surge protection devices, grounding systems, and shielding techniques.

Read our blog to discover the common challenges and solutions regarding data center protection against lightning strikes.

We equip data centres with high-performance lightning and surge protection. Our solutions prevent costly damage and ensure a constant flow of data.

ADVANCE+ lightning arresters are the perfect solution for lightning protection, being able, through proper installation, to conduct all lightning energy safely to ground. In addition, all our lightning ...

Rakworx is a manufacturer of data center infrastructure. Integrated server cabinets, Power Distribution Units, All-In-One Cabinets and Modular Data Centers.

Our comprehensive lightning protection systems and lightning avoidance systems are engineered specifically to solve lightning risks faced by data center operators, to keep you running through the ...

Protecting your data center from lightning requires more than just rods. Mike Leksan explains how advanced lightning protection solutions can safeguard your infrastructure.

Installing CMCE devices in data centers provides a cost-effective solution to minimize the risk of lightning-induced downtime, protecting both equipment and revenue streams. At EMP ...

SKYGUARD integrates fiber isolation or SPD modules on network lines to stop surges from entering through Ethernet or telecom paths. Our filtered PDUs and power conditioners ...
