

With our new photovoltaic modules you can turn your 20" portable cabins and sanitary cabins from our CLASSIC Line and PLUS Line range into a cost-efficient and sustainable space solution.

This review paper provides the first detailed breakdown of all types of energy storage systems that can be integrated with PV encompassing electrical and thermal energy storage systems.

Product features(Containerized Energy Storage System): Low energy consumption, long life, high consistency, high stability. Application scenarios: photovoltaic power plants, wind power stations, ...

With module integrated design for fast installation and easy maintenance, the internal protection mechanisms will ensure a safe and sound operation of battery system; our battery system can meet ...

Foldable Photovoltaic Power Generation Cabin is a containerised solar power solution. Combining the features of solar power generation and mobility, it provides electricity all over the world.

We provide walk-in/non-walk-in energy storage containers, liquid cooling cabinets, marine energy storage containers and various non-standard energy storage products. Meet the ...

These modular solutions combine solar panels with battery storage in weatherproof shipping containers, offering plug-and-play functionality for projects ranging from 100kW to 5MW capacity.

High integration, compact footprint, easy to transport and install, reducing on-site construction costs. Supports PQ, VF, SVG, and VSG modes, with high/low voltage ride-through capability.

The multimodal options for transport, handling and storage, ensure that the BESS container can be easily transported and deployed in various locations, making it ideal for remote or off-grid locations ...

High-temperature technologies can be used for short- or long-term storage, similar to low-temperature technologies, and they can also be categorised as sensible, latent and thermochemical storage of ...
