

London power distribution and energy storage unit 25kW

An analysis that study's the role of energy storage in the UK's transition to net-zero, and identifies the contribution of research and innovation to meeting the deployment challenges.

London Power Post delivers in-depth reporting on the electricity networks that power the capital, with analysis of substations, cables, demand management, and policy.

This dataset reports on UK Power Networks' use of paid flexibility services. UK Power Networks uses flexibility (demand/generation turn up/down) in London, the South East, and the East of...

We're removing overhead power lines from our National Landscapes and Parks, restoring the British countryside to its beautiful best. Click here to view how and where we are ...

Our report highlights the clear benefits of investing in long-duration storage, including energy and economic security, avoiding waste of renewable electricity, and allowing us to deploy ...

LDES projects include pumped storage hydro, compressed air and liquid air energy storage and flow batteries. AG's Energy team looks at the detail behind the scheme proposals and ...

Long-duration electricity storage has multiple benefits: It allows a greater amount of cheap renewable power to be integrated into the electricity system, lowering the overall cost of...

This map outlines the range of credible futures for the growth of the distribution network. These scenarios encompass the growth of demand, storage and distributed generation, as well as low ...

Highview Power, a global leader in long-duration energy storage solutions, today announced plans to construct the UK's first commercial cryogenic energy storage facility (also referred to as liquid air) at ...

This TDD confirms key details of the LDES cap and floor scheme and sets out how this scheme will operate, when application windows will open, how much capacity will be procured, and what projects...
