

Malta was founded to solve a key challenge of the energy transition: enabling reliable, affordable, and scalable long-duration energy storage. Malta Inc. is backed by blue-chip investors and strategic partners.

Malta Inc. - a leading developer of grid-scale, long-duration energy storage - and Bechtel Corporation, one of the world's most respected engineering, construction, and project management companies, has announced they ...

Malta is developing utility-scale long-duration energy storage solutions. Its Pumped Heat Energy Storage (PHES) plant is based on well-established technologies in power generation adapted in a new, innovative ...

Malta's grid-scale, long-duration energy storage system helps governments, utilities, and grid operators transition to low-cost, carbon free renewable energy while enhancing energy security.

Malta SEMS is more than just energy storage--it's an integrated clean energy solution that powers industries, data centers, and cities, stabilizes grids, and delivers flexible clean heat and power, cost-efficiently, ...

Malta Inc, developer of a grid-scale electro-thermal energy storage technology, has closed a Series B funding round, raising US\$50 million from investors that include Facebook co-founder Dustin Moskovitz.

Key features of our technology include its ability to provide long-duration storage from 8 hours to 8 days, its scalability for large-scale deployment of 300 MW and beyond, and its dual functionality in supplying ...

Malta's proprietary and proven molten salt long-duration energy storage system provides a unique combination of capacity and duration for which there are no suitable technology alternatives

Malta's utility-scale, long-duration energy storage system uses steam-based heat pump technology to deliver dispatchable, cost-effective energy.
