

The United States microgrid market was valued at USD 8.99 Billion in 2025. The industry is expected to grow at a CAGR of 13.80% during the forecast period of 2026-2035.

With over 10 gigawatts of microgrid capacity already deployed in the United States and a projected market value surpassing \$30 billion by 2030, the growth trajectory is undeniable.

The key trends of the United States microgrid market include integration of renewables, energy storage, artificial intelligence-enabled smart grid, and critical-infrastructure challenges in defense.

IMARC's report offers a comprehensive quantitative analysis of various market segments, historical and current market trends, market forecasts, and dynamics of the United States microgrid market from 2020-2034.

Discover how the US microgrid market is set to grow at a 16.4% CAGR, driven by renewable energy integration, federal incentives, and advancements in AI technology. Explore market trends, challenges, and opportunities ...

As climate-related disruptions increase and the clean energy transition accelerates, microgrids have gained significant traction across the United States.

North America Microgrid Market Size, Share, Trends & Growth Forecast Report By Grid Type (AC Microgrid, DC Microgrid, Hybrid), Connectivity, Power Source, Storage Device, Application and Country (The ...

The U.S. microgrid market size was estimated at USD 14.82 billion in 2024 and is projected to grow at a CAGR of 18.2% from 2025 to 2030. Market growth is being propelled by rising investment in grid resilience, the ...

This research report categorizes the market for the United States microgrid market based on various segments and regions and forecasts revenue growth and analyses trends in each submarket.

Overall, the U.S. microgrid industry is rapidly evolving, driven by environmental, technological, and economic factors. As energy consumers prioritize resilience, sustainability, and autonomy, microgrids stand out as a ...
