

UL, a global safety science leader, announced the acquisition of Boulder, Colorado-based HOMER Energy, the world leader in modeling and optimization software for microgrids. The acquisition ...

UL Solutions is the exclusive developer and distributor of HOMER (Hybrid Optimization of Multiple Energy Resources) software, a leading global solution for the economic optimization of microgrid ...

HOMER® software helps you design and optimize microgrids and hybrid power systems to tackle costs, grid instability and sustainable energy demands.

HOMER simulates the operation of a hybrid microgrid for an entire year, in time steps from one minute to one hour. HOMER examines all possible combinations of system types in a single run. It sorts the ...

Robust and easy-to-use, HOMER® Grid combines economics, engineering and multiple value streams in one model, then rapidly performs complex calculations to find the least-cost solution.

Draft and optimize microgrids, simulate energy systems and analyze grid-connected and off-grid power projects. HOMER Pro®, part of ULTRUS(TM) software from UL Solutions, helps our customers design ...

The HOMER Pro® microgrid software by UL Solutions is the global standard for optimizing microgrid design in all sectors, from village power and island utilities to grid-connected campuses and military ...
