

Moldova is preparing for its second major renewable energy auction in autumn 2025, this time focusing on onshore wind farms equipped with integrated battery energy storage systems ...

Portugal and Moldova have moved forward with battery energy storage system (BESS) procurements with funding from the EU and USAID.

Moldova is planning a new tender for the construction of large renewable energy parks colocated with battery energy storage for autumn this year. The timeline for the tender was presented ...

Moldova will buy a Battery energy storing system (BESS) of the last generation, with a capacity of 75 MW, as well as internal combustion engines (ICE) with a capacity of 22 MW. This will ...

The Republic of Moldova will install a 75 MW energy storage system (BESS) and 22 MW internal combustion engines as part of a project funded by the U.S. Government through USAID. The ...

Moldova intends to launch a new tender this autumn for large-scale renewable energy generation and energy storage system (BESS) projects, with the specific auction volumes and ...

The Republic of Moldova will install a 75 MW energy storage system (BESS) and 22 MW internal combustion engines as part of a project funded by the U.S. Government through USAID. The ...

The Republic of Moldova has taken another significant step toward strengthening its energy security by initiating the procurement of a state-of-the-art Battery Energy Storage System ...

Moldova will purchase a state-of-the-art Battery Energy Storage System (BESS) with a capacity of 75 MW and internal combustion engines (ICE) with a capacity of 22 MW to strengthen the ...

Building on this momentum, the second auction, scheduled for autumn 2025, will introduce battery energy storage systems (BESS) alongside wind projects, marking a pivotal step in ...
