

Mowing machine under photovoltaic panels

Maximize efficiency and safety with Altoz tracked mowers built for solar farm maintenance. Tackle tough terrain and tight spaces, where others can't.

By keeping grass under control with the MC700, operators can prevent shading, protect panel efficiency, and ensure consistent energy generation. Its compact design allows safe and precise mowing in tight ...

You're telling me that some engineer designed the layout of that solar farm, designed it to have growing plants under the panels, but never thought about mowing?!? Whoops!

The Wright Fence Mower is a PTO-driven mower that makes it easy to weed and cut underneath solar panels without chemicals.

Delivers a 12" cutting width yet folds down to a 72" zero-turn footprint for simple trailering, storage, and site mobilization. Configured to maintain vegetation above 6 inches, supporting solar farm clearance ...

The GreenTec Barrier Mower RI 80 has been the solution for many companies and municipalities in charge of mowing underneath and around solar panels. With an offset carrier and a spring-loaded ...

SPIDER 2SGS mower: A model specially adapted for efficient mowing under solar panels and other low obstacles.

Unlike traditional mowers or heavy machinery, Raymo offers a safe and efficient way to maintain solar farms without damaging the panels. Fully electric and emission-free, it combines sustainability with ...

The Sunswing can reach far under low-positioned solar panels; thanks to the swinging arm, you can mow precisely around the construction. This asymmetrical machine is developed entirely to mow far ...

An ATV solar farm mower is used to keep grass under control around the solar panels, preserving their efficiency by keeping the areas clear.
