

October 21, 2025 - Elinor Batteries has been awarded the contract to supply battery solutions for three large-scale battery parks in Southern Norway, boosting energy storage capacity, reducing grid costs, ...

Discover Norway's first battery cell production site in Arendal, operated by Morrow Batteries. With plans to begin delivering battery units by year-end, Morrow aims to capitalize on its ...

Elinor Batteries plans to build a large-scale battery manufacturing facility in Orkland, Mid-Norway, near Trondheim. The company was founded to advance sustainable production methods and ...

Founded in 2020, Morrow Batteries will initially use existing lithium iron phosphate (LFP) technology and its plant in Arendal, southern Norway, is Europe's first gigawatt LFP factory.

A lithium-ion battery recycling plant is under construction in Norway, focusing initially on electric vehicle (EV) batteries, but the CEO of the company behind it has said that it will also be ...

This article explores how Norwegian lithium battery manufacturers like EK SOLAR address energy storage challenges, support green initiatives, and deliver reliable solutions for industries worldwide.

Elinor Batteries has signed an MoU with SINTEF Research Group to open a sustainable, giga-scale factory in mid-Norway, and HREINN will manufacture 2.5 to 5 million GWh batteries ...

Norwegian battery cell producer Morrow Batteries has opened Europe's first lithium iron phosphate (LFP) gigafactory with an annual production capacity of 1 GWh in a bid to supply the ever ...

Its plant in Arendal, southern Norway, is Europe's first gigawatt LFP factory. "Morrow's main priority is starting up the first 1 GWh LFP battery factory in the second quarter of 2025, working ...

Let's face it - when you think of Oslo, fjords and Nordic winters probably come to mind before lithium batteries. But here's the kicker: Norway's capital is quietly becoming a global poster ...
