

He anticipates that once the arch is finished, it will be adorned with solar panels capable of producing 400,000 kilowatt-hours of electricity annually.

You're surprised to learn that the beautiful objects in front of you are the public-facing components of a larger solar power plant that is providing carbon-free electricity to thousands of nearby homes.

The containerized mobile foldable solar panel is an innovative solar power generation device that combines the portability of containers with the renewable energy characteristics of solar panels.

From Barcelona's solar-powered data sculptures to Tokyo's glow-in-the-dark installations, these creations are rewriting the rules of both renewable energy and public art.

Think black slabs of solar roofing and white wind turbines dotting the landscape. Therefore, through creativity and sculpture, the artists below have all contributed to raising the bar of public art that ...

Discover 10 breathtaking renewable energy art installations that merge creativity and sustainability, showcasing the beauty of clean power.

Arthur Stefenbergs and Lucian Racovitan created a water-harvesting sculpture that comprises two spiral staircases made entirely out of energy-generating solar glass, and it's designed ...

The cycle works simply enough. A solar cell array at the top powers 16 winches that pull the weighted arms upward, storing potential energy. When the pavilion needs electricity, or when ...

Arch of Time is a Land Art Generator artwork designed by Riccardo Mariano. Incorporating solar photovoltaic modules it will generate 400,000 kWh per year, offsetting the electricity demand of the ...

The containerized mobile foldable solar panel is an innovative solar power generation device that combines the portability of containers with the renewable energy characteristics of solar ...
