

As PV modules are the central component of the industry, this analysis reviews market conditions that affect solar panel pricing and availability and makes reasonable predictions about the ...

o In 2024, between 554 GW. dc. and 602 GW. dc. of PV were added globally, bringing the cumulative installed capacity to 2.2 TW. dc. o China continued to dominate the global market, ...

SEIA's latest report highlights that 77% of all solar capacity installed in 2025 (year-to-date) has been in states won by President Trump, including 8 of the top 10 states for new installs.

Between 2025 and 2029, global solar photovoltaic capacity additions are projected to increase yearly and range from some 655 gigawatts in 2025 to 930 gigawatts in 2029.

As module prices fell due to oversupply, installation volumes continued to grow, highlighting both the strength and volatility of the global PV industry.

Photovoltaic (PV) solar accounted for 58% of all new electricity-generating capacity additions through the third quarter of 2025, remaining the dominant form of new electricity-generating ...

Discover the top 10 solar panel manufacturers by global shipments in 2025. Ranking with Jinko, LONGi, Trina, and JA Solar...

China remained the dominant market, installing between 309 GW and 357 GW and accounting for nearly 60% of all new installations. The European Union followed with 66 GW, led by Germany (17.2 ...

The latest Snapshot of Global PV Markets 2025 by IEA-PVPS marks a historic milestone in the solar energy sector: global photovoltaic (PV) capacity has crossed 2.2 terawatts (TW), with ...

Seven of the top 10 manufacturers now operate production facilities in three or more countries, including Cambodia, India, Malaysia, Mexico, and Vietnam. Looking ahead, several top 20 ...
