

How many plug-in hybrid cars are there in South Africa?

There are 23 different plug-in hybrid (PHEV) cars on sale in South Africa right now. PHEVs are a sought-after car type that ostensibly offers the best of both worlds, as it combines an internal combustion engine with an electric motor and a large battery.

Are plug-in hybrid EVs still popular in South Africa?

While the plug-in hybrid EV (PHEV) segment has also seen new models entering the South African market, market share likely remains smaller than that of traditional, or "mild" hybrids.

Are PHEV cars popular in South Africa?

While PHEV sales make up a small fraction of the country's total car sales and are even outpaced by fully-electric sales, these numbers are impressive considering their high prices. The only manufacturers that offer plug-in models in South Africa are luxury brands -- BMW, Jaguar, Land Rover, Lexus, Mercedes-Benz, and Volvo.

Which plug-in hybrids are available in South Africa?

Plug-in hybrids offer a sweet spot, blending the familiarity of petrol engines with some of the advantages of electric power. To help those considering moving to a PHEV, TechCentral has compiled its annual list of all the plug-in hybrids available in South Africa. The BYD Sealion is currently the cheapest PHEV in the South African market.
