

We Efficiently Recycle Your End of Life Wind Turbine Blades. Whether you have a single-blade failure or several hundred end-of-life blades on a repower, Cutting Wind offers custom turn key solutions to ...

Blade Dismantling: Turbine blades are typically detached one at a time using synchronized lifting equipment and rigging systems. Due to their size and weight, removing each ...

We are experts in decommissioning wind turbines, and can provide a complete project management and material solutions service. Our approach draws on our track record of working with utility scale owner ...

Cost Effective Approach to Up-Ending and Down-Ending a Power Plant Generator. Cutting Cost, Saving Time: Inside a Stabilizer Vessel Replacement Project. Lifting & Setting a 200 Ton Concrete Cap on a ...

A system and method for removing or installing wind turbine blades, comprising a single spreader-type bar fitted with specialized end units with rotatable chain and/or cable for supporting...

We explore the structural composition of wind turbine blades, the environmental and economic implications of their disposal, and the potential for energy recovery and waste management.

O'Rourke offers specialized wind turbine demolition, including explosive felling or dismantlement, for minimal environmental impact & maximum material recovery.

MaxxForce delivers safe, sustainable decommissioning--from turbine removal to blade recycling--with site restoration & emergency response.

We are your trusted partner for wind turbine demolition and recycling wind turbine blades, specializing in the decommissioning of wind turbine assets at the end of their life cycle or in the event of ...

Waterjet cutting introduces a non-thermal, precise method for blade removal during wind turbine decommissioning. The controlled cutting ensures swift and accurate dismantling without ...
