

Renewables are set to reach 46% of global electricity generation by 2030, with solar and wind driving most of the growth. The world is projected to ...

Analysis & Projections Monthly and yearly energy forecasts, analysis of energy topics, financial analysis, congressional reports.

By analyzing data and forecasts from various sources, including government reports, industry publications, and academic studies, this study provides insights into the trajectory of ...

New installations of generating capacity support the increase in our renewable generation forecast. Wind and solar developers often bring their projects on line at the end of the calendar year.

This growth highlights the importance of battery storage when used with renewable energy, helping to balance supply and demand and improve grid stability. Energy storage systems ...

In our Annual Energy Outlook 2022 (AEO2022) Reference case, which reflects current laws and regulations, we project that the share of U.S. power generation from renewables will ...

On October 16, 2024, the International Energy Agency (IEA) released its latest annual World Energy Outlook (WEO). This flagship publication is the most authoritative global source of ...

In 2026, renewable developers are expected to emphasize near-term agility--diversifying inputs, stockpiling, and digitizing visibility--while investing in long-term resilience through reshoring, ...

Renewables 2025 is the IEA's main annual report on the sector. It presents the latest forecasts and analysis, based on recent policy and market ...

In its Annual Energy Outlook 2021 (AEO2021), the U.S. Energy Information Administration (EIA) projects that the share of renewables in the U.S. electricity generation mix will increase from ...

RFF's annual Global Energy Outlook harmonizes a range of long-term energy projections to find key trends in global energy consumption, emissions, ...

In addition to changes to NEMS, we also updated the way we calculate primary energy consumption of electricity generation from noncombustible renewable energy sources such as solar, ...

Includes annual state-level data for energy production, consumption, prices, and expenditures by fuel and

sector, including renewable energy categories such as biofuels, wind, and solar

Find data from forecast models on crude oil and petroleum liquids, gasoline, diesel, natural gas, electricity, coal prices, supply, and demand projections and more.

Geopolitical uncertainty, shifting policies, and increasing demand for power are reshaping the energy landscape. In this year's report, we present our updated view on what's to come in the ...

Energy Information Administration - EIA - Official Energy Statistics from the U.S. Government
