

Responsibilities of the New Energy Storage Committee

SEIA led a broad coalition to pass a 3,000 MW procurement for Battery Energy Storage Systems (BESS). This legislation will break open new markets for grid-scale, distributed, and behind-the-meter energy storage while ...

How can DOE contribute to helping maximize the benefits of energy storage? What is left to do? What is the role of hydrogen and power to gas technologies in the decarbonization and long-term strategy of the electric ...

The Committee's report on long-duration energy storage concludes that the Government must act fast to ensure that energy storage technologies can scale up in time to play a vital role in decarbonising the electricity ...

It will help us advance energy storage technologies, make intermittent resources more competitive, maintain a reliable supply of energy storage materials, and ultimately reduce greenhouse gas ...

In its 2022 Biennial Energy Storage Review ("2022 BESR"), EAC examined DOE's implementation strategies to date from the ESGC, reviewed emergent energy storage industry issues, and identified ...

Energy Independence and Security Act of 2007 (EISA) Energy Storage (Technologies) Subcommittee of EAC formed in March 2008 in response to Title VI, Section 641(e)

Stepping up efforts to develop new energy storage technologies is critical in driving renewable energy adoption, achieving China's 30/60 carbon goals, and establishing a new power system.

Join the energy storage community as we explore pathways to grid-scale energy storage that can meet the needs of our nation now and in the future. Gain insights into groundbreaking solutions, stay informed about ...

The TES-2 Committee is now actively seeking participants with expertise in thermal energy storage systems using phase change materials as the storage medium to contribute to the development of this proposed ...

Conduct technical sessions and webinars; publish articles, papers and technical reports; and participate in forums and conferences to inform the industry of milestone progress as the Electrical Energy ...
