

The plant, which will be the first of SOLARCYCLE's facilities to manufacture glass in addition to recycling solar panels, is scheduled to begin construction in 2024 and will be operational ...

Vitro Architectural Glass has initiated a significant investment plan to expand its Wichita Falls, Texas, location to allow for the annual production of up to 25 million patterned solar glass lites upon ...

Hover over a planned solar project to view information on each project like their name, capacity and construction date. To get access to our full dataset of every clean energy project in the United States, ...

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.

With PV module capacity ramping up, glass suppliers have been investing in new solar glass production capacity. As in India and China, new facilities are popping up in North America, with...

At Onyx Solar, we understand that every project is unique. To meet specific requirements, we offer two advanced photovoltaic (PV) glass technologies: amorphous silicon and crystalline silicon, both fully ...

With PV module capacity ramping up, glass suppliers have been investing in new solar glass production capacity. As in India and China, new facilities are popping up in North America, with ...

From California to New England, construction of solar energy is picking up speed, showing promise for hitting sustainability goals. In this article, we cover the largest solar energy ...

According to Vitro officials, the expansion will establish a new patterned solar glass facility, including a new furnace, a roll-forming chamber and a cooling and production line.

Adrian Sada, Vitro CEO, said the Wichita Falls location had the necessary infrastructure, supply chain, glass operations and maintenance expertise to support current architectural glass ...
