

Solar control glass can be specified for any situation where excessive solar heat gain is likely to be an issue, eg. large facades, glass walkways, atria and conservatories.

Let the light in with Mitrex Solar Glass -- a powerhouse in disguise, where photovoltaics meet limitless design, where color meets clarity. You're not just choosing glass; you're choosing a future where ...

Unlike regular glass, which is transparent, solar photovoltaic glass has a layer of photovoltaic cells embedded within it. When sunlight passes through the glass, the photovoltaic cells convert the ...

In Extralum we offer special glasses with acoustic control and solar control. Ideal for your home, company or commercial premises.

Solar control glass is made of specially coated or tinted glass that has specific optical properties that allow it to block a portion of the sun's radiant heat energy. This glass reduces the ...

This problem can be rectified by reflexive solar control and selective solar control glass which, thanks to its special construction, limits overheating while maintaining a high level of light transmission.

Our CLEAR Solar Photovoltaic Window Glass can be combined in layers with our other high tech glass technologies for the ultimate in customization! Call or email us NOW and be among the first to ...

The special properties of solar control glass let natural daylight in, while reflecting a high proportion of the sun's heat. The indoor space remains bright but cooler compared to uncoated glass.

Solar glass is a type of glass that is specially designed to harness solar energy and convert it into electricity. It is made by incorporating photovoltaic cells into the glass, allowing it to ...

Customized ITO / FTO conductive glass plays a crucial role in scientific experiments, offering excellent conductivity, transparency, and stability. Ideal for photovoltaics, sensors, and analytical instruments.
