

The product offers support for a rich set of data protocols, including TCP/UDP/HTTP, enabling it to connect with diverse protocol servers and facilitating the remote monitoring of solar energy ...

Ideal for areas covered by a Wifi network or where a hardwire connection to the router is preferred, the new Solis Wifi-LAN "sticks" ensure data collection is faster and more reliable.

Product Description USR-S100-WA12 is a Wi-Fi solar data stick launched by PUSR for data communication of photovoltaic inverters.

By collecting operating status and power generation of inverter, stick logger can run a long-term and efficient monitoring of PV system, which increases work efficiency and reduces management cost ...

S1-W4G-ST data stick is a brand new one of a kind datalogger. This datalogger uses cellular technology to connect to Soliscloud. Not only does it have that, but you can also connect with WIFI.

Introducing the Solis S3-WIFI-ST Datalogging WIFI Stick, the perfect solution to enhance the data collection and monitoring capabilities of your solar inverters.

Built for compatibility with Solis inverters (excluding S6 series), this compact device supports both Wi-Fi and LAN connectivity, enabling real-time system data collection and remote performance tracking via ...

The Solis S4-WIFI-ST WiFi Data Logger Stick is an innovative accessory designed for Solis solar inverters, enabling efficient and remote monitoring of solar system performance via a wireless ...

The Solis S3-WIFI-ST data logger operates by collecting data from connected inverters and transmitting it over a wireless connection. This process is straightforward, allowing both technical and non ...
