

Self-leveling, high and low temperature resistance, excellent aging resistance, insulation, moisture resistance and shock resistance. It is specially used for various potting and sealing of solar ...

The potting materials formulated at Epic Resins have a wide range of characteristics to address the specific needs of solar power electronics. In addition to our polyurethane and epoxy potting ...

Watch this video to learn about various dispensing, potting, bonding and sealing applications for the production of inverters!

The inverter glue dispensing machine is a glue metering mixing potting device specially used for solar photovoltaic inverter glue filling.

XG-6100 MI silicone potting compound, with its soft gel and good thermal conductivity and waterproof performance, is aimed at micro inverters as the key solar photovoltaic components ...

Guangdong Huachuang Electronic Materials Co., Ltd. offers high-quality epoxy resin potting materials specifically designed for solar power systems, providing the necessary protection ...

HN-6607A/B Two-Component Potting Silicone Gel is a very soft, low cross-linking density addition potting silicone gel. It is a low viscosity liquid before vulcanization.

Organic silicon potting adhesive has very stable usability and is not affected by UV, high temperature, humidity, or ozone even in harsh environments.

Potting compounds, encapsulating materials, and solar panel bonding adhesives for renewable energy batteries, jboxes, charge controllers, and micro inverter systems.

Epic Resins offers a complete range of bonding, potting and encapsulating products for solar energy applications. Epic Resins products are designed for optimal thermal management critical in solar ...
