

Available in both 100kWh and 215kWh capacities, this modular system integrates power modules, batteries, cooling, fire protection, and environment monitoring in a compact outdoor cabinet.

It supports remote upgrades, arbitrary parallel combinations, and has IP54 ruggedness. Perfect for large solar farms, industrial microgrids, or critical infrastructure, it maximizes the use of renewable energy, ensures grid ...

Designed for outdoor deployment, the cabinet features weather-resistant construction, efficient ventilation or air conditioning, and options for battery and DC distribution integration.

Unleash peak performance and unparalleled security with our Air-cooled Energy Storage System. This modular powerhouse seamlessly integrates AI-powered intelligence for optimized operation and cloud-based ...

The all-metal sealed cabinet with IP65 protection level can withstand harsh environments such as heavy rain, dust, and salt spray. It has been tested to operate stably in plateaus at an altitude of 4,000 meters, coastal ...

Perfect solution for remote, indigenous, and isolated communities as well as disadvantaged community microgrid and nanogrid projects. Drop-in, pre-packaged and easy to implement at low cost with modular ...

This outdoor cabinet for energy storage system (ESS) applications is engineered to house batteries, inverters, and controllers with superior protection and durability.

Product Features: Standardized structure design, menu-type function configuration, photovoltaic charging module, a parallel off-grid switching module, power frequency transformer, and other components can be ...

10kVA Inverter | 20kWh battery storage as standard. The lithium PLUS micro-grid range offers an all-in-one solution for reliable, safe and climate controlled outdoor battery storage and system control.
