

This is the product of combining collapsible solar panels with a reinforced shipping container to provide a mobile solar power system for off-grid or remote locations.

SpaceTech has shipped the first four solar array panels for the European Space Agency - ESA PLATO spacecraft mission to Thales Alenia Space. These panels are being developed in a cooperation of ...

Spectrolab manufactures and tests fully-integrated solar panels for commercial, civil and defense missions. These solar panels are then delivered to satellite prime contractors for integration onto ...

The spacecraft solar array wins the trade between size, weight, power, complexity, cost, technology readiness, and reliability.

Comprehensive Solutions: Our offerings include rigid space photovoltaic solar panel assemblies (PVA), solar panel substrates, solar power modules (SPM), and flexible PVA panels.

Growth in the field is evidenced by a global spacecraft solar panel market projected to reach \$2.1B with a 12.4% CAGR to 2030, and radiation-hardened or flexible thin-film solutions capturing a large share ...

In this section you can find details of individual space grade solar cells and products from across the global market. You can click on any of the links below to find out more about the ...

Satellite Solar Panels for space applications from multiple manufacturers are listed on SATNow. Use the filters to select products based on your requirement. View product details, download datasheets, ...

Assured quality for an attractive price with a short lead time. A ready to launch product, with easy ordering and easy integration onto your spacecraft. Sparkwing is our off-the-shelf solar array answer ...

When it comes to delivering space power for missions, MMA's solar array systems crush the competition. Our high performance, deployable and nondeployable/body-mounted, semi-rigid-panel ...
