

Thailand rechargeable energy storage vehicle equipment

What is Reess (rechargeable electrical energy storage system)?

The draft Ministerial Regulation mandates the Rechargeable Electrical Energy Storage System (REESS) for the propulsion of Battery Electric Vehicle (BEV) of categories M and N to conform with the standard for vehicles of category M and N with regard to specific requirements for the electric power train (TIS 3026-2563 (2020)).

How do I find out more about vehicle regulations in Thailand?

To find out more about vehicle regulations in Thailand, please contact the Institute for Global Automotive Regulatory Research directly. Thailand published Ministerial Regulation on Rechargeable Electrical Energy Storage System of vehicles category M and N (TIS 3026-2563 (2020)).

How will Thailand's electric vehicle industry grow?

Thailand's electric vehicle (EV) industry is expected to expand driven by supporting government policies, growing consumer demand, and increasing foreign investments, particularly from Chinese Original Equipment Manufacturers (OEMs).

Does Thailand have an EV industry?

Thailand's EV industry is on track for growth as the country strives to become a key regional hub for EV manufacturing. Key trends driving this growth include government policies promoting EV adoption, advancements in battery technology, declining EV ownership costs, and the expansion of supporting services.
