

At the federal level, there are several key policies, programs, and regulations that impact the development of solar PV and other renewable energy projects, influencing project procurement ...

Since taking office, the Trump Administration has paused permits on all new wind and solar projects on public land, both onshore and offshore. New wind and solar power installations, and ...

This page describes the patchwork of federal, state, and local policies and regulations pertaining to renewable energy systems that impact project development.

A new policy requiring the Interior secretary to approve all aspects of solar and wind project permitting has opened the floodgates for critics who say it's the clearest signal yet that green ...

With an ambitious target of generating 40% of the nation's electricity from solar sources by 2035, the law establishes unprecedented tax credits for solar installations, streamlines permitting ...

The expansion of energy projects on public lands stands at a critical juncture with new leadership in Washington. The transition will bring heightened scrutiny to existing policies, raising ...

US solar added 18 GW in early 2025, but Trump policies could slash growth by 55 GW by 2030, raising costs and risks, says a new SEIA report.

In the wake of this directive, the federal government has taken actions to encourage the deployment of renewable energy and other low-carbon energy sources.

-- Today the Solar Energy Industries Association (SEIA) is unveiling a new policy agenda that details the critical actions that local, state, and federal leaders must take to strengthen the ...

Electricity generation by the U.S. electric power sector totaled about 4,260 billion kilowatthours (BkWh) in 2025. In our latest Short-Term Energy Outlook (STEO), we expect U.S. ...
