

The neighbor in front installed photovoltaic panels

While the simple solution may be to close curtains or blinds until the sun moves, some neighbors won't stop there. Glaring sunlight can heat a room and make it uncomfortable to be in without shielding your ...

Solar panels on a neighboring property can raise questions about aesthetics, shading, safety, and local regulations. While many homeowners welcome renewable energy, objections may be legitimate in ...

Solar panels on a neighboring property can raise questions about aesthetics, shading, safety, and local regulations. While many homeowners welcome renewable energy, ...

My neighbor just mentioned to me that he sees high glare from about 5-8 panels for about 45 minutes per day. He expects me to have the panels relocated somewhere else on my roof so the glare goes ...

If you'd like to explore solar panel options for yourself, EnergySage can help you spot savings from the get-go, knocking up to \$10,000 from the upfront installation price.

For example, let's say you install solar panels but your neighbor has trees that grow too close to your roof and block the sun from hitting your panels. In this case, you may obtain a solar easement that instructs your ...

When it comes to installing solar panels, they are typically mounted on a property's roof or within its premises. However, there may be cases where property owners wish to install ground-mounted solar panels near their ...

If solar energy systems installed on your property are adversely impacting your neighbors, several steps can be taken to address the issue efficiently and amicably.

Navigate solar panel disputes with HOAs and neighbors. FindLaw explains your legal rights, state laws, and solutions for resolving conflicts.

A homeowner's right to install solar panels is not absolute and can be subject to various rules. A neighbor's ability to object to an installation depends on a complex interplay of local government regulations, ...

A resident complained to the Town Board after a Queensbury man installed a large ground-supported solar array measuring 50 feet long and 16 feet tall that hovered within 3 feet of his property line. ...
