

UAE-based developer AMEA Power and the government of Tunisia have commissioned the country's largest solar project in Kairouan. The 120 MW project is expected to generate approximately 222 ...

Anglo-Tunisian group SoleCrypt announced plans for a 60 MW PV plant in Tozeur, part of a broader initiative to connect eventually to the Medusa submarine cable, enhancing Tunisia's energy...

The addition of 1.3 GW of solar capacity is set to transform Tunisia's energy sector. It will substantially reduce the country's dependence on imported fossil fuels, which currently dominate its energy ...

Tunisia is finally accelerating the deployment of its large-scale photovoltaic (PV) sector after years of slow progress, with construction now underway across multiple major projects, PV-Magazine reported.

Tunisia accelerates clean energy transition by awarding large-scale wind and solar projects to global developers under its 1.7GW plan.

Tunisia has already awarded contracts for four utility-scale #PV projects with a total generation capacity of 1.7GW. The solar farms are expected to come online during either 2025 or 2026.

Tunisia has signed contracts for four photovoltaic projects, totaling 500 MW, as part of the initial phase of its 1.7 GW tender. Set to be operational by 2027, these projects aim to generate 1 TWh annually, ...

In October 2024, Tunisia launched a new tender for 200 MW of large-scale solar, with submissions due by Jan. 15, 2025. Tunisia's total solar capacity reached 506 MW by the end of 2023, ...

Under the latest round of awards, the government selected several global companies to develop large-scale wind and solar projects across the country. French renewable energy firm Voltalia secured a ...

Tunisia is advancing utility-scale solar through a series of tenders, including the latest procurement round launched in January 2023. It previously completed a 500 MW solar tender in...
