

Near the village of Carrington in north-west England, the foundations are being laid for the world's largest commercial-scale liquid air energy storage facility, one of the first of its kind.

Highview's liquid air energy storage system captures excess renewable energy during periods of low demand, storing it as liquid air for hours, days, or weeks. When required, the stored air ...

Ofgem has launched a new cap and floor investment support scheme, unlocking billions in funding to build major Long Duration Electricity Storage projects for the first time in 40 years.

Taking the UK power system as a case study, this paper presents an assessment of geological resources for bulk-scale compressed air energy storage (CAES), and an optimal planning ...

An engineering-led collaboration between Sulzer and Highview Power will help provide long-duration energy storage at Highview Power's new facility at Carrington, Manchester, which will ...

Our energy teams gives an overview of Compressed Air Energy Storage, its advantages and current opportunities in the UK.

Construction to begin imminently at commercial-scale liquid air energy storage (LAES) plant in the United Kingdom. Major investors include Centrica, which joins as a strategic partner.

Compressed Air Energy Storage could be the solution to Britain's struggling energy system. As renewable energy generation continues to accelerate, the UK is struggling to keep up with increased ...

Compressed air energy storage, and especially Sherwood Power's AACAES system, has the potential to meet this demand, helping businesses, governments, and the energy sector as a ...
