

UK Procurement of Two-Way Charging Containers for Energy Storage

To get around these problems, Bristol-based electric car specialist Fellten has developed a "portable" EV charger solution that makes use of recycled electric car batteries and old shipping...

In March 2022, the government set out its vision for EV charging infrastructure in the UK EV infrastructure strategy. Today's joint action plan, developed with Ofgem, builds on that vision...

EV specialist Fellten has launched a new all-in-one charging system designed to speed up the UK's electric transition by removing the need for planning permission. The innovative Fellten ...

This project represents ABP's first deployment of a BESS. As a pilot, it will provide the organisation with essential operational and commercial experience, and its success may enable ...

All the anticipated electric vehicle (EV) batteries by 2040 would offer around 2.5 terawatt hours of storage - enough to store much of the UK's surplus solar power generated at bright summer...

Battery energy storage systems are a growing cornerstone of the UK's energy infrastructure. These projects carry high technical demands and strict programme pressures, particularly where grid ...

It's time for UK local authorities to rethink their approach to EV infrastructure. Traditional procurement tenders may no longer be the best way to ensure high-quality, reliable, and rapidly ...

We deliver complete EV charging systems for commercial use -- from fleet depots to car parks. This includes charger supply, DNO approvals, cabling, and certified installation. Our systems balance EV ...

Find UK government contracts. Procurement notices containing battery storage. 188 matched over past year.

By leveraging second-life EV battery packs and modular containerised design, we are delivering a cost-effective, scalable product that supports businesses and public infrastructure with ...
