

As Great Britain progresses toward a more secure, zero-carbon energy future, we're relying on a wider variety of generation sources than ever before. A main source is sunlight, which ...

With strong links to storage, EVs and smart grids, solar plays a leading role in the shift to net zero. Our research, policy work and advocacy shape regulation and drive market growth.

The Solar Roadmap details government and industry actions that will be delivered to radically increase the deployment of solar in all its forms across the UK.

Our research delivers real-world results that monitor and improve solar electricity generation and performance in the UK. We also perform cutting edge research into the development of next ...

Solar Farms UK - Interactive Map Why Solar Farms? Features of The Interactive Map How to Use The Map The Bigger Picture Solar farms are large-scale solar installations where photovoltaic (PV) panels, commonly known as solar panels, are used to convert sunlight into electricity. They play a crucial role in the UK's strategy to reduce carbon emissions and combat climate change. By understanding where these farms are located and how they are distributed across the coun... But where are these farms? How much energy do they produce? And what do the next 10 years look like? This updated 2025 guide combines an interactive map, regional insights, and policy ...

UK Solar Power Ltd is one of the leading solar manufacturers with an impressive portfolio of contracts and years of experience. It was established in 2016 and made its way to global distribution of high ...

Published on Nov. 5, 2024, the Clean Power in 2030 report lists 47 GW of deployed solar capacity by 2030 as one of the key features of a carbon-free grid. The latest capacity figures published by...

Some solar cells work better in direct sunlight, others can use more diffuse light. While insolation rates are lower in England than France and Spain, they are still usable.

We will push ahead on a solar rooftop revolution, while tackling the barriers of planning, grid, supply chains and skills. Publishing this Roadmap is just the beginning of our journey - and we...
