

In 2025 Ukraine deployed around 1.5 GW of new solar capacity driven by strong interest in co-located battery energy storage systems. BasenPower breaks down the key drivers, policy ...

The Solar Energy Association of Ukraine estimates around 1.5 GW of solar was added in the country last year, driven by growing interest in projects co-located with battery energy storage ...

This report explores the current policy landscape for distributed solar PV in Ukraine and outlines three potential policy options to accelerate the deployment of this technology.

The 24 February 2025 marks 3 years since Russia invaded Ukraine. Three years later, continued support to Ukraine has never been more important. The war in Ukraine has underscored the critical ...

In December, the International Energy Agency published a report covering three strategies for accelerating deployment of distributed solar-plus-BESS in Ukraine.

Even as relentless attacks threaten its energy infrastructure, Ukraine is demonstrating remarkable resilience by significantly increasing its solar power capacity.

Following three years of bombardments and damage to its energy infrastructure, Ukrainian businesses are turning to self-consumption solar PV systems to keep the lights on.

Ukraine's solar market is booming amid blackouts. See 2025 demand drivers, payback, financing tools and risks - a guide for foreign PV investors.

Critical shortages are driving demand in Ukraine for decentralised energy generation and system resilience, but rollout is currently too slow-paced for Ukraine's National Energy and Climate Plan ...
