

Our tools enable microgrid monitoring, predictive analytics, and performance tracking. Learn more on our page about decentralized energy systems and analytics. Discover how solar and batteries are ...

Our main focus is on solar trackers and advanced solutions for solar power plants. We are the exclusive supplier of tracker systems in Ukraine, enabling maximum efficiency in harnessing the sun's energy. ...

Control systems consist of electromechanical drives, control unit and software. The solar radiation sensor, designed by "Ukrainian Systems Solar" LLC, is a miniature dual-axis tracker with a ...

Currently, the company is a developer and manufacturer of a full range of single- and double-axis solar trackers of 5 - 140 kW installed capacity. To date, there are more than five hundred trackers of over 7 ...

Company profile for Mounting System, Tracker manufacturer Ukrainian Systems Solar TOV - showing the company's contact details and products manufactured.

In 2025, SSK significantly strengthened its position in the market by implementing more than 220 MW of solar power plants across Ukraine.

Developed and manufactured entirely in Ukraine, the tracker is engineered to meet European quality standards and is supported locally, providing an alternative to imported systems.

This plant is the first in Ukraine built using a domestic single-axis tracker. It demonstrates how transitioning from traditional fixed systems to dynamic tracker technologies can enhance the ...

The use of trackers in solar power is not new globally, but for Ukraine, this case marks a new chapter. Until now, most local stations were built on fixed structures, which simplified installation ...

This facility is the first in Ukraine built with a single-axis tracker of domestic production. Its commissioning represents a technological leap forward for the industry, improving efficiency, ...
